

Please follow the below steps to begin the new Blue Heaven Technologies test request process.

Start at: www.blueheaventech.com. Go to the Contact Us page. Click the link “Test Request Form” to submit your new test request. **For best results please use the latest version of Google Chrome or Mozilla Firefox.**

1. You will be redirected to our new Test Request form: Job Creation for Lab Test Requests. Fill out the form and click the blue button at the bottom to begin the process. This has now created a job for you within the BHT system.
2. After submitting you will be directed to all the BHT Workbooks. (These are basically the same workbooks you have been using only in an online format.)
3. Select the appropriate workbook for your test type. HVAC/Industrial workbook is for ASHRAE 52.2, ISO 16890, Burst and other HVAC test methods. The Flat Sheet workbook is for flat media samples, ASHRAE 52.2, ISO 16890, EN 779 etc. The Automotive workbook is for ISO 5011 and ISO 11155. The Cleanroom workbook is for ISO 29463, EN 1822, ANSI, AHAM etc. The Specialty workbook is for AAR, ARAMCO, NIOSH, ASTM etc.
4. Fill out the filter description information and all test parameters. One form per sample to be tested.
5. If you have more forms to be filled out because of multiple tests, click “yes” for “submit another” test request. You will be redirected back to the list of workbooks to begin your next test request.
6. When you are finished, you will see a Thank You page that gives you the BHT internal job number assigned to your job. This is VERY IMPORTANT. Print this page off and put it in the box with your product or mark your samples or box with the job/test number to ensure that we can correctly match your product with your request. You will also receive an email that gives you this number and lets you know that we have received your test request. Job number and Test number are interchangeable terms (example 24-123).

~ ~ ~ ~ IMPORTANT ~ ~ ~ ~ ~

If your product is coming from an outside location where you cannot put the paperwork in the box, please make sure to indicate where the product is coming from in the Remarks section so we can match the product to the test request.

Once your product(s) are received, they will be matched up with the test request form you submitted. When testing has started you will get an email notifying you that testing has started.
